

Economical bolt-on generator output breaker solution  
 Direct mount on connection box (right or left side)  
 Space saving installation reduces engineering & labor cost  
 One part number solution for complete assembly  
 No measuring, drilling, cutting or fabricating required

## K9 SERIES Breaker Box

ALTERNATOR SIZE	BREAKER AMPERAGE	BREAKER ASSEMBLY PART NUMBER	DESCRIPTION	OPTIONAL WIRE KIT
280 Frame	50 amp	BK-280M-50A	280 FRAME 50 AMP ASSY	WK-150AMP
280 Frame	60 amp	BK-280M-60A	280 FRAME 60 AMP ASSY	WK-150AMP
280 Frame	100 amp	BK-280M-100A	280 FRAME 100 AMP ASSY	WK-150AMP
280 Frame	125 amp	BK-280M-125A	280 FRAME 125 AMP ASSY	WK-150AMP
280 Frame	150 amp	BK-280M-150A	280 FRAME 150 AMP ASSY	WK-150AMP
280 Frame	175 amp	BK-280M-175A	280 FRAME 175 AMP ASSY	WK-250AMP
280 Frame	200 amp	BK-280M-200A	280 FRAME 200 AMP ASSY	WK-250AMP
280 Frame	225 amp	BK-280M-225A	280 FRAME 225 AMP ASSY	WK-250AMP

Black painted steel enclosure and faceplate with a Marathon 280 frame side plate hole pattern, which contains an Eaton generator molded case circuit breaker and a connection wiring pass-through hole above the breaker for convenient routing to the generator leads or a link board assembly. Neutral and Ground terminals are mounted in the enclosure.

BREAKER BOX MAY BE MOUNTED ON EITHER SIDE OF ALTERNATOR  
 280 FRAME SIDE VIEW

Wire Kit leads are approximately 36" with ring terminals.

The breaker is mounted in the enclosure for shipping and doesn't require removal for mounting or installation.

Marathon connection box side plate hardware is reused for mounting the breaker assembly. No additional hardware needed.

Eaton breaker accessories (auxiliary switches & shunt trips) are available as a loose part for field installation.

*Note: For standard Marathon connection boxes only.*
