

Economical bolt-on generator output breaker solution
 Direct mount on connection box (right or left side)
 Space saving installation reduces engineering & labor cost
 One part number solution for complete assembly
 No measuring, drilling, cutting or fabricating required

K9 SERIES Breaker Box

ALTERNATOR SIZE	BREAKER AMPERAGE	BREAKER ASSEMBLY PART NUMBER	DESCRIPTION	OPTIONAL WIRE KIT
360 Frame	50 amp	BK-360M-50A	360 FRAME 50 AMP ASSY	WK-150AMP

360 Frame	500 amp	BK-360M-500A	360 FRAME 500 AMP ASSY	WK-800AMP
360 Frame	600 amp	BK-360M-600A	360 FRAME 600 AMP ASSY	WK-800AMP

Black painted steel enclosure and faceplate with a Marathon 360 frame side plate hole pattern, which contains an Eaton generator molded case circuit breaker and a connection wiring pass-through hole above the breaker for convenient routing to the generator leads or a link board assembly. Neutral and Ground terminals are mounted in the enclosure.

BREAKER BOX MAY BE MOUNTED ON EITHER SIDE OF ALTERNATOR
 360 FRAME SIDE VIEW

Wire Kit leads are approximately 36" with ring terminals.

The breaker is mounted in the enclosure for shipping and doesn't require removal for mounting or installation.

Marathon connection box side plate hardware is reused for mounting the breaker assembly. No additional hardware needed.

Eaton breaker accessories (auxiliary switches & shunt trips) are available as a loose part for field installation.

Note: For standard Marathon connection boxes only.
